

**Product and process for preparing a green pea skin extract with antiviral activity**

**PI :** Prof. Hui-Wen CHEN

Department of Veterinary Medicine, National Taiwan University

**Experience:** <https://sites.google.com/site/winnichenlab/>

**Market Needs:** Emerging and re-emerging viral diseases pose a serious threat to human and animals health. There is a pressing need to develop an affordable and potent antiviral biological product to improve the public health.

**Our Technology:** By extracting the skin of green peas, an antiviral compound can be obtained for further use.

**Strength:** The skin of green peas is of low cost but high economic value to generate a potent antiviral product for biomedical and veterinary application.

**Competing Products:** None

**Intellectual Properties:** Application in progress
