

## Oligonucleotide Pairs, Probe and Methods for Detecting *Staphylococcus capitis*

**PI :** Prof. TZU-PIN LU

Institute of Health Data Analytics and Statistics, National Taiwan U.

**Experience:**

<https://scholars.lib.ntu.edu.tw/entities/person/8250f447-8cfa-4862-8058-4aaa36f98cd1>

**Market Needs:**

Biological test and medical device

**Our Technology:**

The invention relates to a pair of primers and a probe for detecting *Staphylococcus capitis*. The mixture which contains the primers is subjected to polymerase chain reaction. The PCR product is detected to identify whether the sample contains *Staphylococcus capitis*.

**Strength:**

There are few related technologies on the market for detecting the target and it shows potential competitive advantages.

**Competing Products:**

None

**Intellectual Properties:**

None
